Dear Hiring Manager,

I am writing to express my interest in the Senior Software Engineer position currently available at Tencent. I am excited to pursue an opportunity to join the team to build core media product features, and to delivery high quality products. I am a results-focused and accomplished IT Professional and Senior Software Engineer with a wealth of experience in developing high performance, highly reliable, and scalable web applications on a SaaS platform. Possessing a Master's degree in Computer Science with years of experience, I feel this position aligns perfectly with my skills, experience, and career aspirations.

As the Sr. Software Engineer at Intuit, I devised and implemented Account Service, Validation Service, and Wallet Cash Service on Payments platform serving many-core Intuit products. I led the migration of services from the Intuit datacenter to AWS with Kubernetes. I redesigned the feature, payment account history from a legacy application, transitioning from DB triggers to API implementation, and made it accessible to all integrating clients and data analysis and allowing for data analysis and risk checking to rely on the history data, which was not accessible to them before.

I am skilled in building enterprise web application/services, highly scalable, reliable, and maintainable. I have a proven track record of completing complex projects on time with superior quality and reliability. I am equipped with a rich mixture of analytical and strategic skills that successfully impact operations. Exhibits professionalism, accuracy, attention to detail, and a dedicated work ethic. I would welcome the opportunity to expand upon the value I can bring to Tencent within an interview setting. Thank you for your time and consideration of my credentials.

Regards,

**ZHENSHAN GUO**
